

Select a Display Setting

The game's display setting system provides two display settings to choose from. The user selects either the "Normal Display" or "Colorblind Display". The system applies the "Colorblind Display" to the system and provides the user with a confirmation note. The user confirms the change.

Select the Play Mode

The user chooses to start a game. The system provides the user with two options to choose from: "Play Online" or "Play Offline". The user chooses a play mode. The system starts the game in that mode and informs the user about the mode the game is being played in.
